

REMARKS

In the office action dated April 28, 2004, the Examiner rejected claim 14 under §112 first paragraph for failing to comply with the written description requirement and under §112 second paragraph for being indefinite.

Applicant has amended claim 14, deleting the phrase objected to by the Examiner and adding the limitation of a Bragg grating. The Bragg grating is found on page 24 of the specification and described as used with the pulse laser which is claimed in claim 13, giving a high degree of control to the laser. The Bragg grating is sufficiently described in the specification to convey that the inventor had possession of the claimed invention, and the limitation also distinctly claims the subject matter of the claim. Applicant therefore believes that claim 14 is allowable and respectfully requests that the rejection be withdrawn.

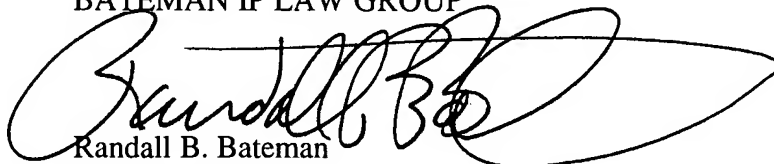

Applicant has also amended claim 10 to correct two spelling errors.

Applicant therefore believes that the claims are in condition for allowance. Should the Examiner determine that additional adverse action is necessary, it is requested that he contact Randall B. Bateman at (801) 533-0320 so that such matters may be resolved as quickly as possible.

Please note the Assignment and the Revocation and Power of Attorney which were recently filed regarding the present application. Please direct all further communications to Applicant's new attorney of record, Randall B. Bateman.

Sincerely,

BATEMAN IP LAW GROUP
